such as Oval and Round Plates, Mirror Frames, and Candlesticks, in solid and stamped brass.

SILBER'S PATENT PETROLEUM BURNERS AND PUNKAH OR STORM PROOF LAMPS.

The Silber (Patent) Circular Burner (for burning petroleum, paraffin, or kerosene) gives a light equal to 22 sperm candles, and with the present method of winding the wick no difficulties are experienced. The wick is flat, $2\frac{1}{2}$ inches wide, but by the process of winding it emerges at the top of the wick-tubes in a circular form. In consequence of only about the thirty-second of an inch of wick being exposed above the wick-tube (to produce the necessary efficient light), it carbonises very slowly, and the only attention required to keep the wick in proper condition for performing its functions is to rub a duster over it so as to remove the charred portion once every three or four days, and to fill the oil container with oil every day.

Light for light, it is the most economical burner extant.

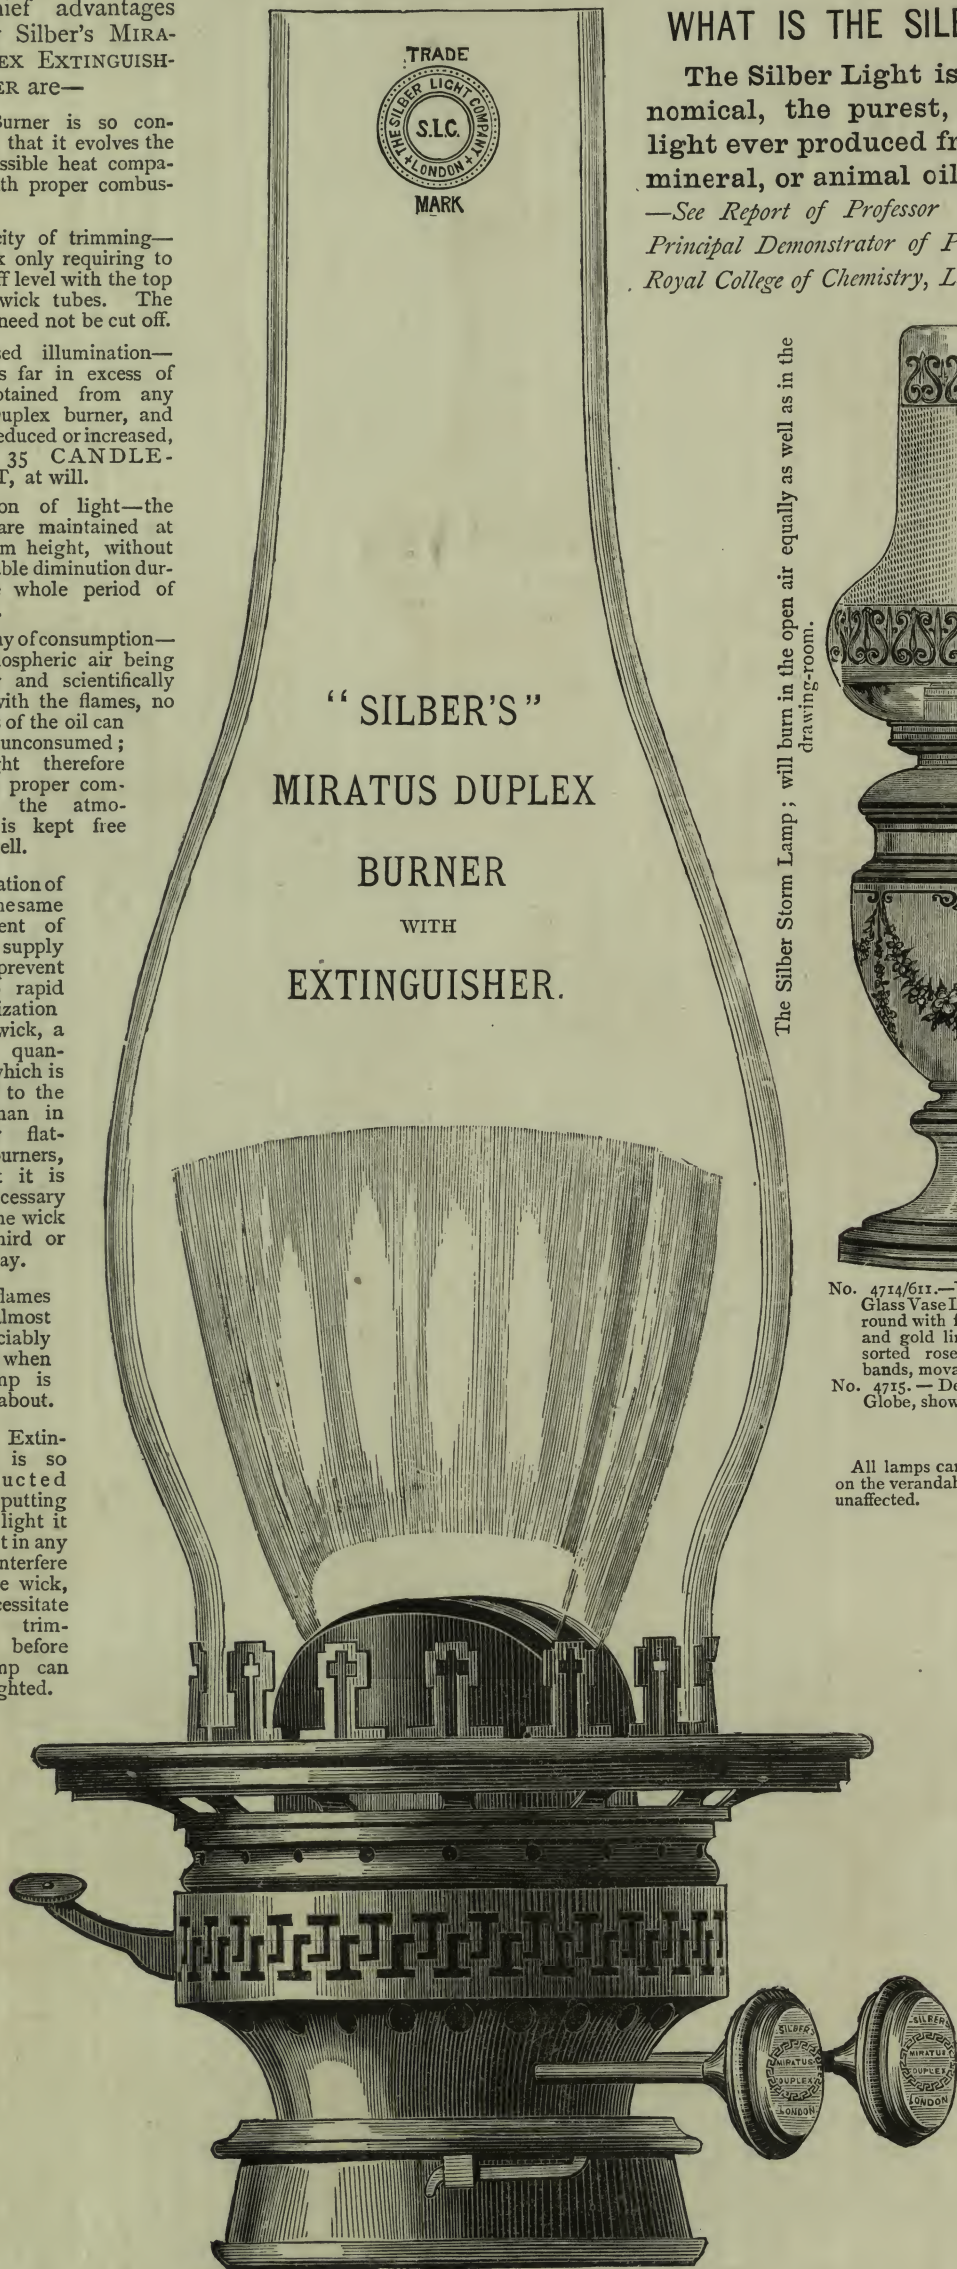

This burner can be supplied with a screw collar as shown on lamp No. 4731, on page 139; with the Universal Collar as shown in the engraving No. 4713 on this page; or with the bayonet fastener collar as shown in engraving 4712, also on this page.

The Silber Miratus Duplex Burner offers all the advantages explained in paragraphs 1 to 8 on this page. It has two parallel wicks, each $1\frac{1}{4}$ inches wide.

The Silber Miratus Burner is of similar construction to the Miratus Duplex Burner, but has only one wick, $1\frac{1}{2}$ inches in width, and is not provided with an extinguisher. The light it affords is equal to that of about 25 sperm candles.

The chief advantages offered by Silber's MIRATUS DUPLEX EXTINGUISHING BURNER are—

1. The Burner is so constructed that it evolves the least possible heat compatible with proper combustion.
2. Simplicity of trimming—the wick only requiring to be cut off level with the top of the wick tubes. The corners need not be cut off.
3. Increased illumination—which is far in excess of that obtained from any other Duplex burner, and can be reduced or increased, up to 35 CANDLE-LIGHT, at will.
4. Duration of light—the flames are maintained at a uniform height, without appreciable diminution during the whole period of burning.
5. Economy of consumption—the atmospheric air being properly and scientifically mixed with the flames, no particles of the oil can pass off unconsumed; the light therefore showing proper combustion, the atmosphere is kept free from smell.
6. Preservation of wick—the same adjustment of air supply tends to prevent the too rapid carbonization of the wick, a smaller quantity of which is exposed to the flame than in ordinary flat-wick burners, so that it is only necessary to cut the wick every third or fourth day.
7. The flames are almost inappreciably affected when the lamp is carried about.
8. The Extinguisher is so constructed that in putting out the light it does not in any way interfere with the wick, nor necessitate further trimming before the lamp can be re-lighted.

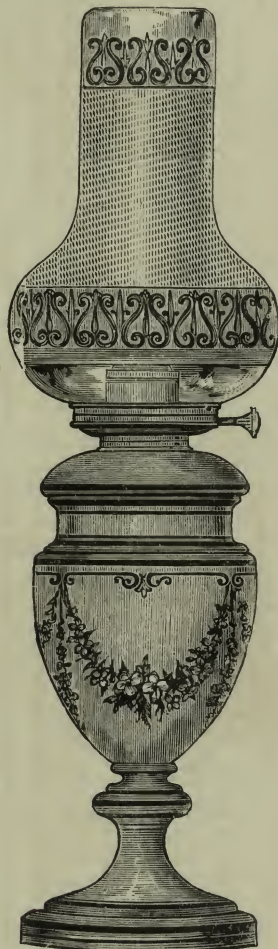

"SILBER'S"
MIRATUS DUPLEX
BURNER
WITH
EXTINGUISHER.

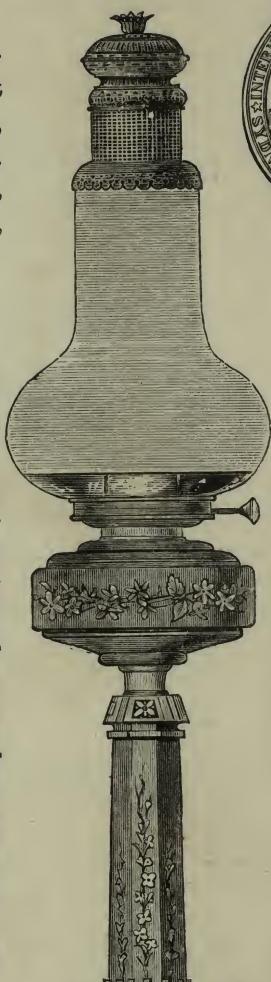

WHAT IS THE SILBER LIGHT?

The Silber Light is the most economical, the purest, and steadiest light ever produced from vegetable, mineral, or animal oils, or coal gas. —See Report of Professor William Valentin, Principal Demonstrator of Practical Chemistry, Royal College of Chemistry, London.

The Silber Storm Lamp; will burn in the open air equally as well as in the drawing-room.

The Silber Punkah Lamp will burn perfectly steady under a punkah.

All lamps fitted with the Silber Patent Circular Storm Burner will burn equally well in the open air as in the drawing-room.

No. 4714/611.—White Bohemian Glass Vase Lamp, decorated all round with festoons of flowers and gold lines, and with assorted rose, blue, or black bands, movable oil container.
No. 4715.—Decorated Punkah Globe, shown above.

No. 4716/743.—Very handsome solid cast brass Tripod Stand, lacquered or bronzed and relieved with richly decorated Bohemian glass pillar and oil container, mounted with improved Wind or Punkah Proof Burner.
No. 4717.—Opal Punkah Globe, with clear crystal bottom, shown above.
No. 4718.—Bronzed or relieved Punkah Top, shown above. This top offers increased resistance to the agitation of the punkah.

No. 4719/737.—Richly cut Crystal Pillar, fitted with electro-plated mounts and improved Silber Storm burner.
No. 4720.—Three-quarter ground Punkah Globe, shown above.

All lamps can be fitted with Silber's Wind or Punkah Proof burners, the advantages of which are that under a punkah, on the verandah, in the camp, or elsewhere, exposed to the wind or violent agitation of the air, the light remains perfectly unaffected.

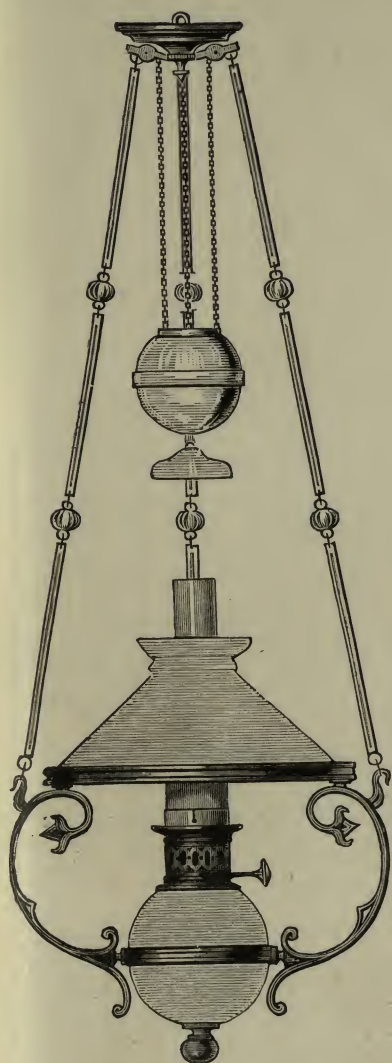

No. 4712/828.—SILBER'S MIRATUS DUPLEX BURNER, with EXTINGUISHER, is constructed upon the most approved scientific principles, and affords a higher illuminating power than any other Duplex Burner in the Market; it is fitted with a Collar which enables it to interchange with the ordinary Duplex Burner. (Drawn full size.)
For advantages offered by this burner please read paragraphs 1 to 8 on this page.

No. 4713/672.—The New Silber (Patent) Petroleum Burner, with latest (1879) improvements, the advantages of which are described above.

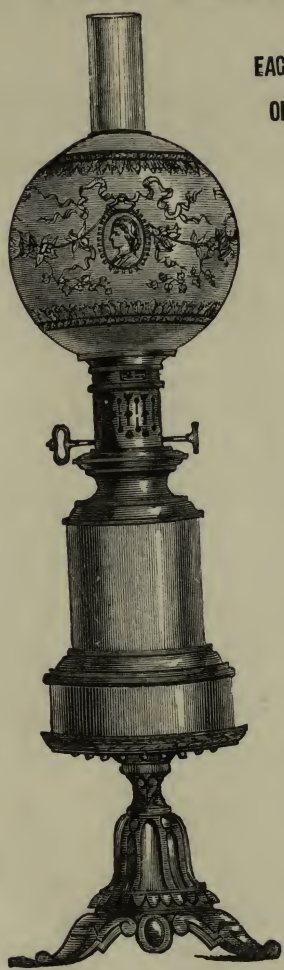

The prices quoted are in accordance with the quality of the lamps or burners. All lamps can be had mounted with any ordinary burner if required.

First Class Award,

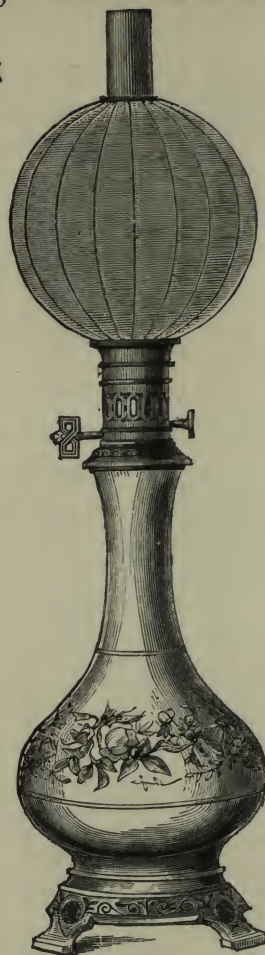

Sydney, 1880.

No. 4735/720.—Bronze Suspension, with movable opal oil container, and 12-inch opal shade, very suitable for church and schoolroom purposes.

No. 4736/475.—Lacquered Brass Suspension, with star-cut flint oil container.

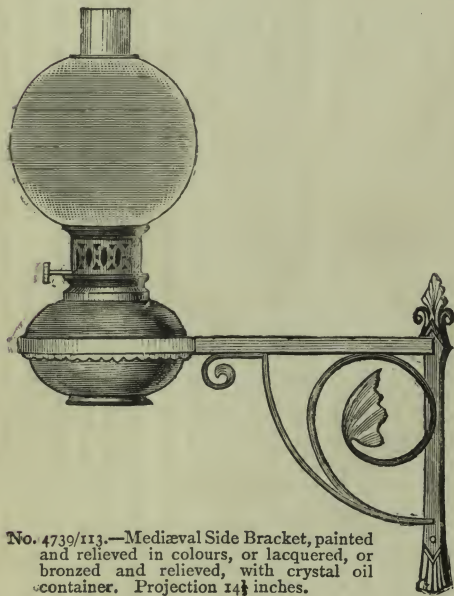

No. 4737/723.—Polished Brass Ecclesiastical Suspension, with cut crystal oil container.

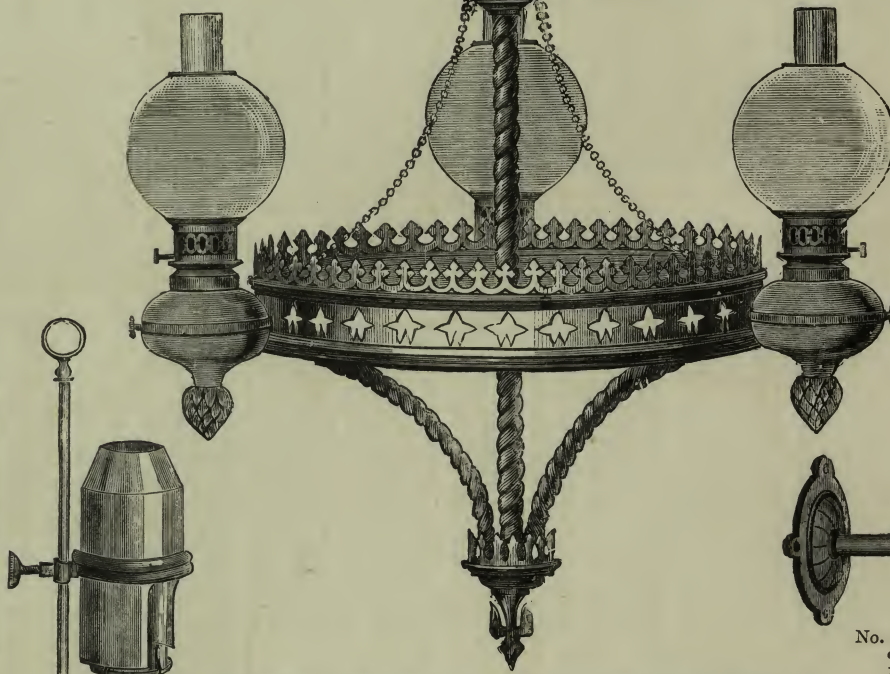

No. 4738/725.—Polished Brass Ecclesiastical Suspension, and 12-inch opal shade.

NOTE.

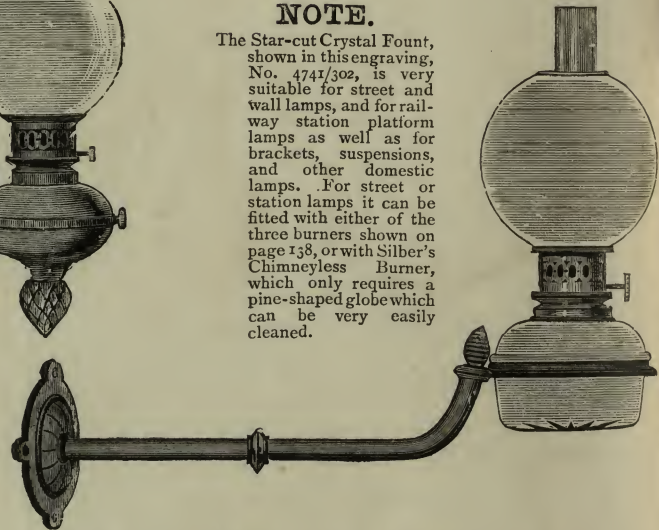

The Star-cut Crystal Fount, shown in this engraving, No. 4741/302, is very suitable for street and wall lamps, and for railway station platform lamps as well as for brackets, suspensions, and other domestic lamps. For street or station lamps it can be fitted with either of the three burners shown on page 138, or with Silber's Chimneyless Burner, which only requires a pine-shaped globe which can be very easily cleaned.

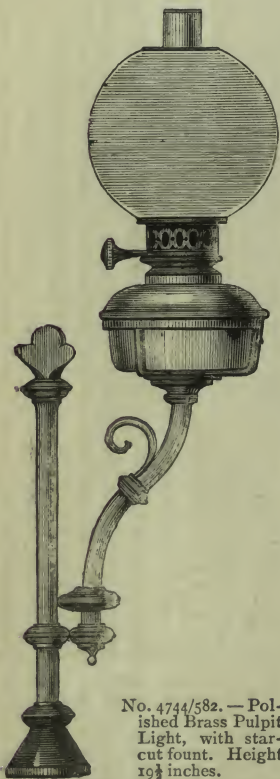

No. 4739/113.—Medieval Side Bracket, painted and relieved in colours, or lacquered, or bronzed and relieved, with crystal oil container. Projection 14 1/2 inches.

No. 4740/200.—Three-light Gothic Corona, in polished brass, or painted and relieved in colours, with cut crystal founts. Extreme length 4 feet 7 inches. Corona can also be had fitted with the star-cut fount, as shown in Engraving No. 4741/302 on this page.

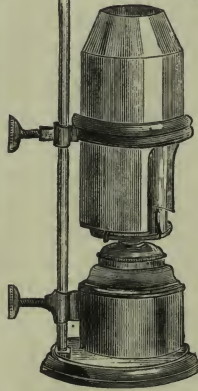

No. 4741/302.—Medieval Bracket, in ecclesiastical colours, or lacquered, or bronzed and relieved, with star-cut bottom clear crystal movable fount. Projection 18 inches.

No. 4744/582.—Polished Brass Pulpit Light, with star-cut fount. Height 19 1/2 inches.

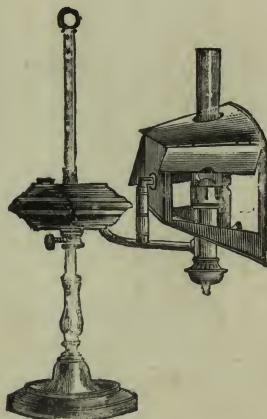

No. 4745/112.—Medieval Side Bracket, painted and relieved in colours, or lacquered, or bronzed and relieved, with crystal oil container. Height 15 1/2 inches; projection 16 1/2 inches.

No. 4742/926.—Microscope Lamp, in lacquered brass, with white porcelain concentrator, so arranged that the light can be raised or lowered at will.

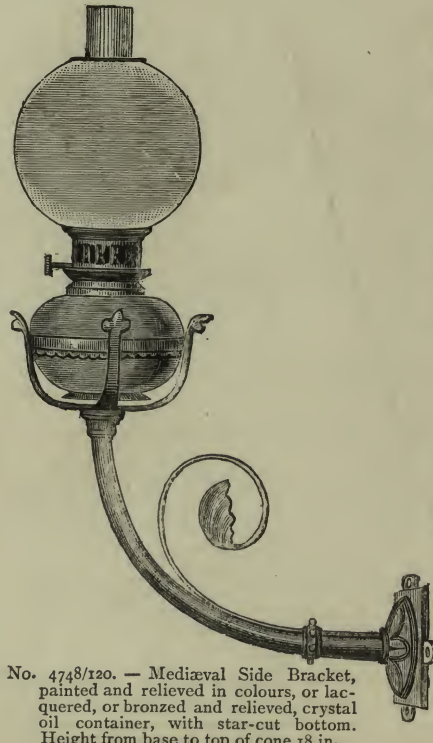

No. 4743.—A larger and more useful Microscope Lamp, fitted with Silber Burner, porcelain concentrator, French lens condenser, and movable ring, for holding porcelain hot water bath or drying closet, in polished brass.

No. 4743bis, as No. 4743, but in japanned tin.

No. 4746/927.—Polished Brass Reading Lamp, with patent Silber Burner, for Colza oil, fitted with the Wellington shade, which enables the reader to obtain the full benefit of the light without the inconvenience of having the heat of the lamp so near his face as with the ordinary reading lamp.

No. 4747/927.—As No. 4746, but nickel or electro-plated. Can also be had for burning petroleum, paraffin, or kerosene; please state which is required when ordering.

No. 4748/120.—Medieval Side Bracket, painted and relieved in colours, or lacquered, or bronzed and relieved, with crystal oil container, with star-cut bottom. Height from base to top of cone 18 in.

No. 4749/110.—Gothic Pulpit Light, painted and relieved in colours, or lacquered, or bronzed and relieved, with crystal oil container. Height to top of cone 2 feet.

OF THE SILBER LIGHT COMPANY.

First Class Award,

Sydney, 1880.

Contracts estimated for. Specifications given. Railway and ship companies shortest supplied on the notice.

Orders executed and dispatched promptly.

Great care bestowed in packing all our goods.

SILBER'S PATENT TUBULATED OR ARGAND GAS BURNER.

The Silber Tubulated Gas Burner, for the amount of gas consumed, gives more illuminating power than any other gas burner yet introduced; when a 7-inch chimney is used it gives a light equal to 22 sperm candles for a consumption of 5 cubic feet of gas per hour, and by substituting a larger chimney a proportionate increase of light is obtained. Chimneys kept in stock, 7-inch, 8-inch, 9-inch, 10-inch.

SILBER'S PATENT CONCORDIA (FLAT-FLAME) GAS BURNER.

In this new burner the Silber Light Company claims to have ascertained the proper point at which the convergence of two flames should occur, and by the introduction of a properly and mathematically adjusted combination, the atmospheric oxygen is driven into the flame at the right elevation, and in this way better combustion is induced. The results given by these burners are absolutely unprecedented and without parallel in any flat-flame gas burner hitherto before the public.

SILBER'S BATSWING GAS BURNER.

These burners are constructed for burning from 2 cubic feet of gas per hour, and they are superior to any batwing gas burners in the market.

All our glass is well made and annealed, each chimney and globe carefully gauged, and the packing so arranged that breakage is reduced to a minimum.

CAUTION. Any person infringing the Copyright of this Book will be prosecuted under the Act.

SHIP, STREET, AND STATION LAMPS, POLICE AND HAND LANTERNS.

First Class Award,

Sydney, 1880.

TRADE

MARK.

EACH LAMP BEARS THE TRADE MARK

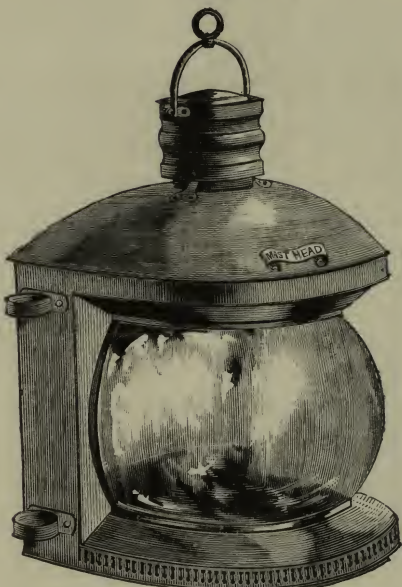

OF THE SILBER LIGHT COMPANY.

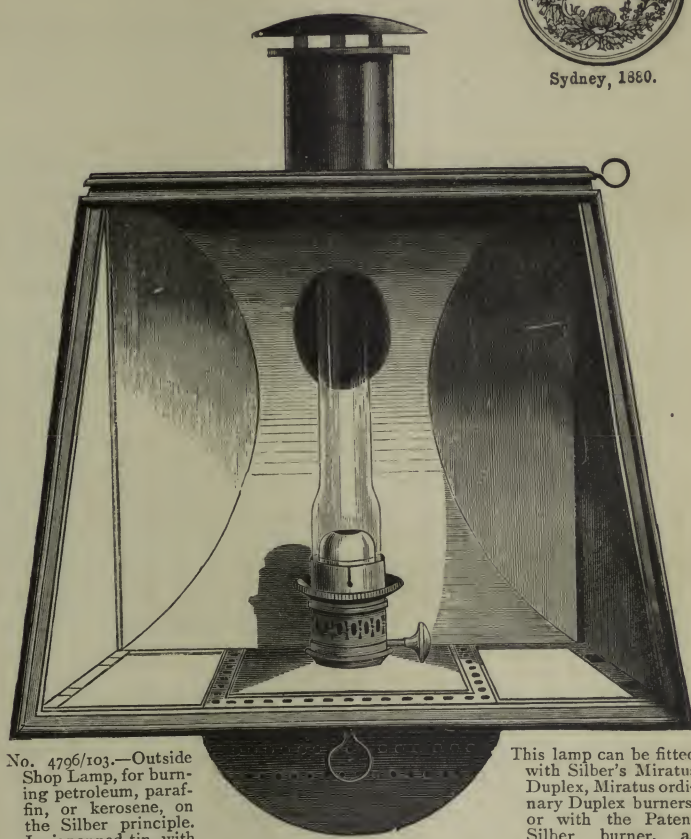

Sydney, 1880.

No. 4794/569.—Railway Station or Wall Lamps, for burning petroleum, paraffin, or kerosene, made in four sizes. They are absolutely wind-proof, and keep the oil at a very low temperature, as all the air to support combustion circulates around the oil container. They are used upon some of the chief railways in England, and in Tea Houses and the like in the colonies and elsewhere.

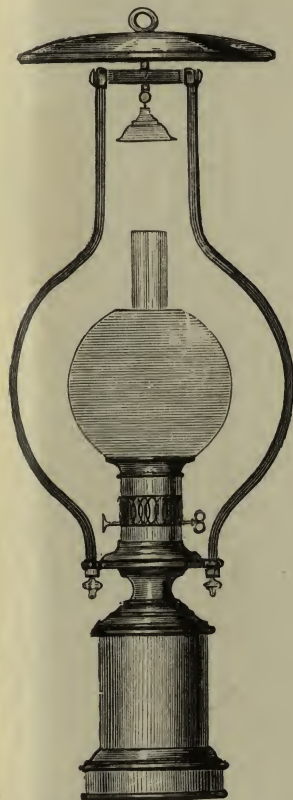

No. 4795/913.—Ship Signal Lamps in copper, japanned tin, or galvanised iron, with plano-convex or dioptric lenses, to burn colza oil or petroleum as desired. Constructed in accordance with the Board of Trade regulations. Silber's Patent Masthead and Bow Lanterns, for burning colza oil without a chimney, with flat or circular wicks. These lamps are constructed upon scientific principles, and will burn from 16 to 24 hours without requiring any attention. They are supplied to the English, French and German navies.

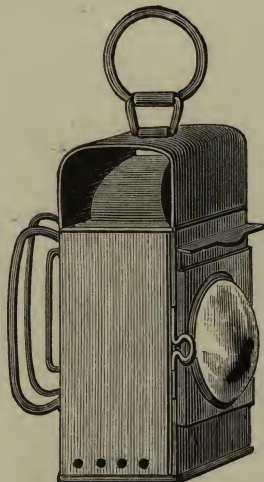

No. 4796/103.—Outside Shop Lamp, for burning petroleum, paraffin, or kerosene, on the Silber principle. In japanned tin, with polished interior.

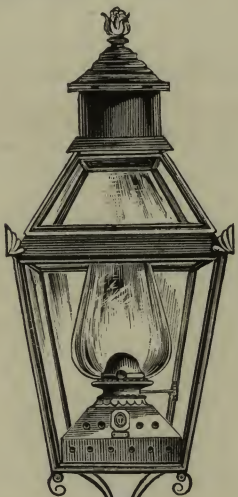

This lamp can be fitted with Silber's Miratus Duplex, Miratus ordinary Duplex burners, or with the Patent Silber burner, as drawn.

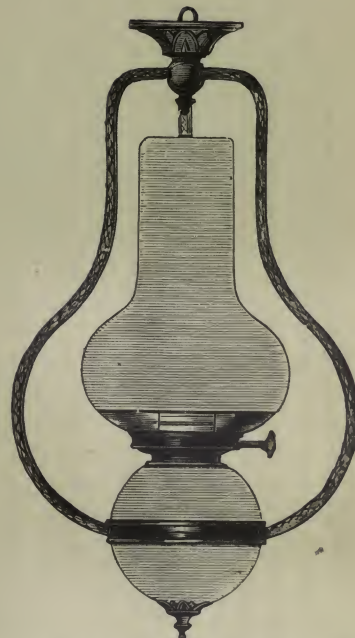

No. 4799/776.—Lacquered or bronzed and relieved brass Suspender, with bronzed Moderator Lamp, for saloon purposes. Can also be had nickel-plated. This lamp burns colza or other vegetable oils.

No. 4797/478.—Japanned Hand Lantern, with bull's-eye and dark slide. A variety of similar lanterns kept in stock. Burn only colza or other vegetable oils.

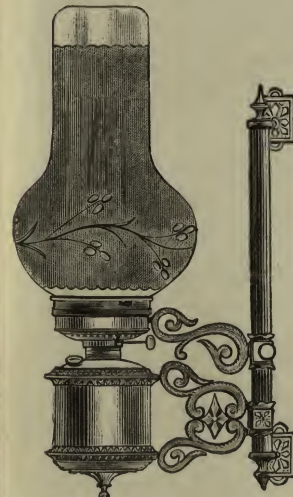

No. 4798/522.—Japanned Bull's-eye Dark Lantern, in all sizes. Burns only colza or other vegetable oils.

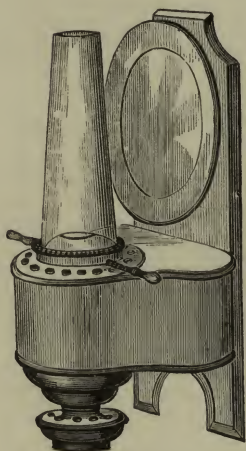

No. 4802/785.—Lacquered brass Saloon Suspension, with wind-proof burner and movable oil container, for burning petroleum, paraffin, or kerosene. Can also be had for burning mineral sperm oil.

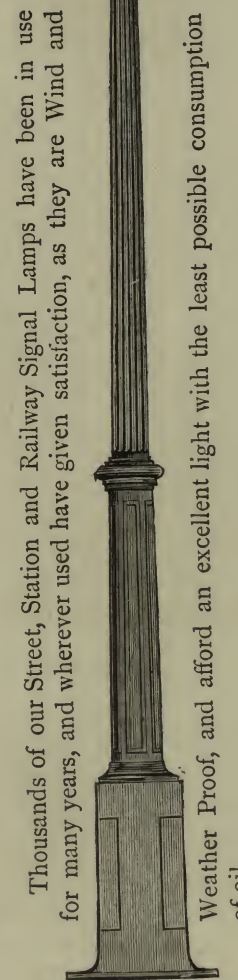

No. 4800/789.—Brass Gimbalbed Bracket Lamp, for colza oil.

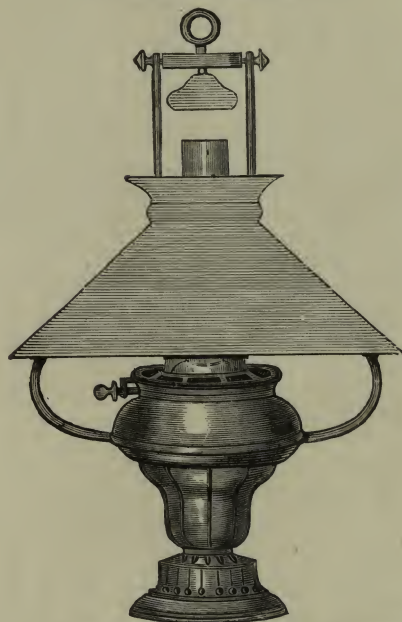

No. 4803/915.—Bracket Lamp, lacquered, bronzed and relieved, nickel or electro-plated, fitted with wind-proof burner. This lamp burns mineral sperm oil, petroleum, paraffin, or kerosene, and is so arranged that the globe and upper portion of the burner can be raised for removing the reservoir with the greatest facility. Every variety of Ship Lamps estimated for. Drawings and prices forwarded on application free.

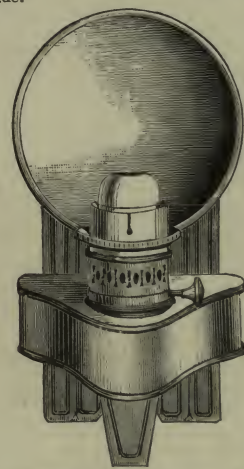

No. 4804/783.—Japanned (colza oil) Back Lamp, with electro-plated reflector, very suitable for cabins and passages.

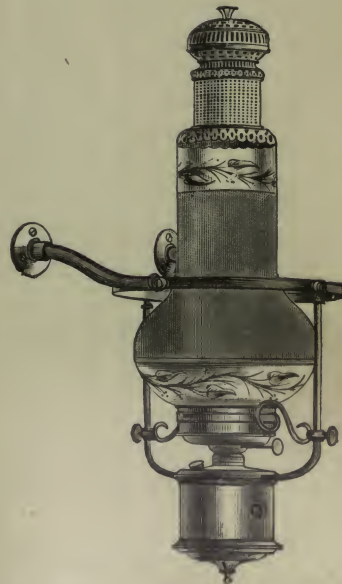

No. 4805/871.—Silber's Patent Street or Station Platform Lamp, for burning petroleum, paraffin, or kerosene. It is made to fit the ordinary 14-inch iron cradle. The strongest wind will not affect the light in this lamp. The leading railways in England use them for station platform purposes, and they are also in use in all parts of the world. A large variety of Street Lamp Columns at various prices.

No. 4801/781.—Lacquered or bronzed and relieved Suspension, to burn colza oil, for ship's use, with opal shade.

No. 4806/116.—Japanned Back Lamp, with electro-plated reflector and Silber '79 burner. Can also be had fitted with Silber's Miratus Duplex, Miratus, or ordinary Duplex burners.

No. 4807/914.—Lacquered, bronzed and relieved, nickel or electro-plated Gimbal Bracket Lamp, fitted with wind-proof burner. This lamp burns mineral sperm oil, or petroleum, paraffin, or kerosene, and is so arranged that the globe and upper portion of the burner can be raised for removing the reservoir with the greatest facility.

No. 4828/397. — Brass Stand Lamp, lacquered or bronzed and relieved.

No. 4829/887. — Italian bronzed or extra gilt Stand Lamp.

In addition to the lamps represented on this page, we have a large assortment of Table, Suspending, Bracket, Wall, and Outdoor Lamps of every description always in stock and in course of manufacture. Prices are quoted without globes or chimneys, and vary according to the description of burner and oil container required.

The prices quoted are in accordance with the quality of the lamps or burners. All lamps can be had mounted with any ordinary burner if required.

SILBER'S AEROTHERMS (HEATING STOVES) FOR BED AND SITTING ROOMS, HALLS, AND GREENHOUSES, AND COOKING STOVES FOR CULINARY PURPOSES.

FIRST CLASS AWARD,

FIRST CLASS AWARD.

SYDNEY, 1880.

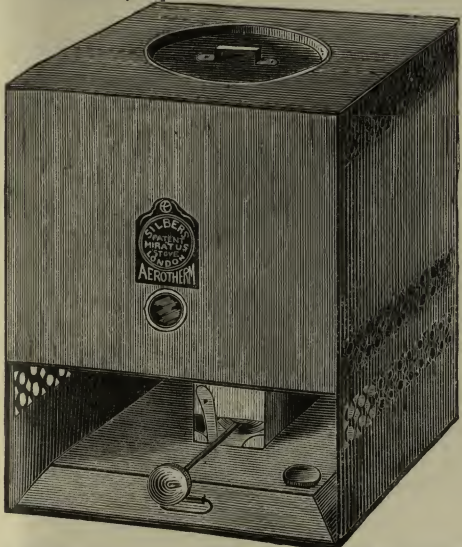

EACH STOVE BEARS THE TRADE MARK

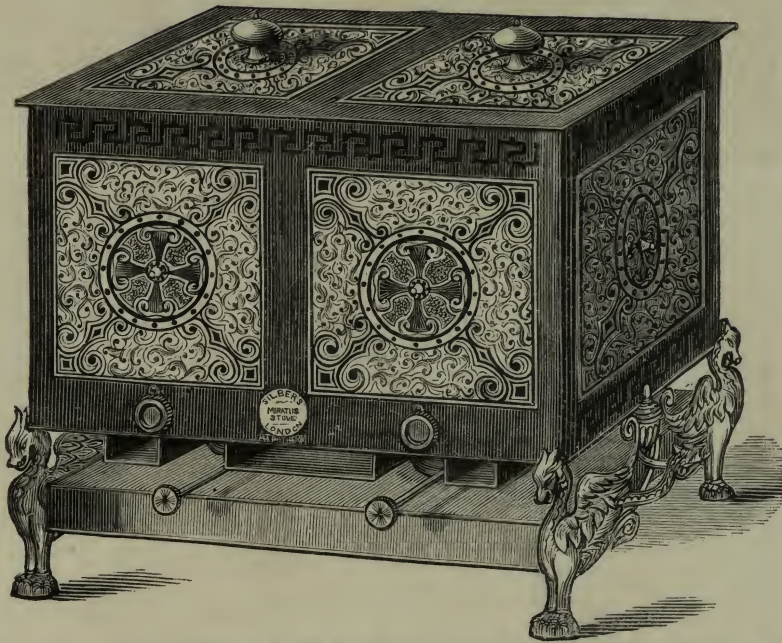

OF THE SILBER LIGHT COMPANY.

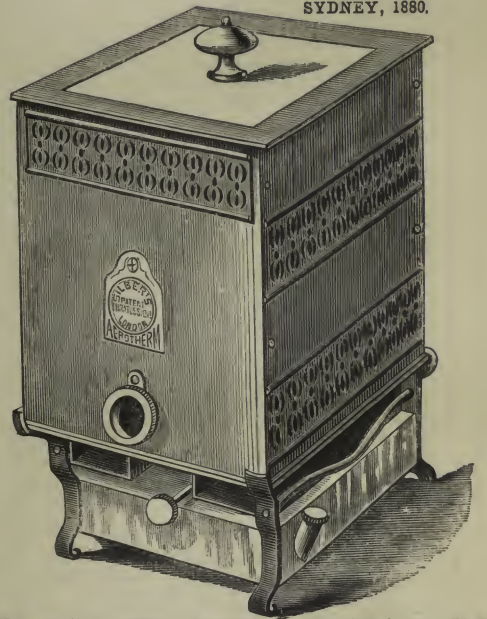

SYDNEY, 1880.

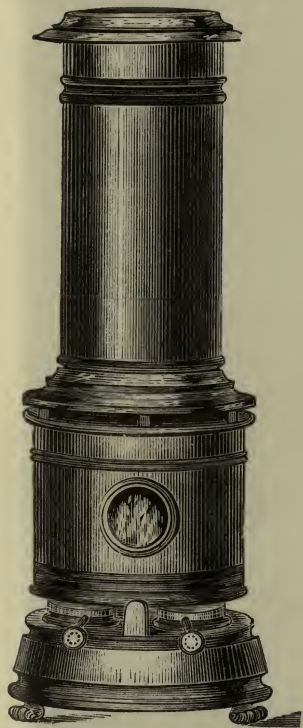

No. 4830/923.—This Stove (Silber's Aerotherm) is so arranged that air enters at either side of the flue at the lower end, and passing up over its heated service has its temperature much raised before being liberated at the orifices on either side at the top. The small plate at top can be removed, and a kettle, saucepan, or frying-pan substituted for boiling or cooking purposes. This stove is also made with a china top, similar to that shown upon engraving No. 4834 (the third in this row).

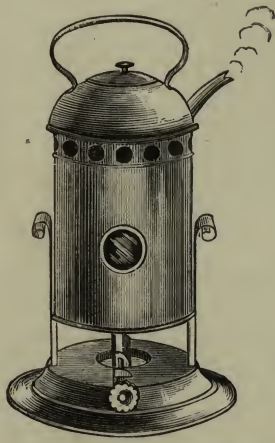

No. 4831/904.—This Stove (Silber's Double Aerotherm) is constructed upon principles similar to No. 902 (see next engraving), but, in addition to the atmospheric chambers at either end, it has a large chamber between the two burners through which the cold air of the apartment is drawn in considerable volume and liberated at a very high temperature. Ornamented with decorated tiles. No. 4832 as No. 4831, but with plain white tiles. No. 4833 as No. 4831, but in plain japanned iron. These stoves are also suitable for cooking purposes, as two utensils can be employed on the top.

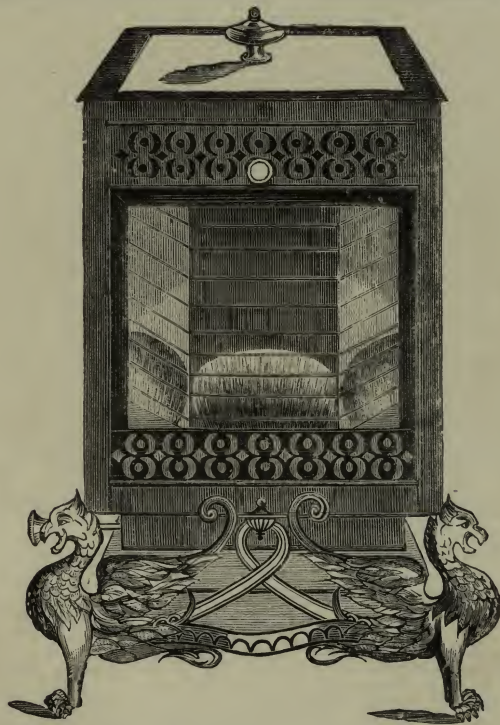

No. 4834/902.—Silber's Aerotherm, or Heating Stove. This stove is specially constructed for raising the temperature of rooms, halls, and conservatories. The flue is made of china or other ceramic ware, and on both sides there are atmospheric chambers into which the cold air of the apartment is drawn and liberated at the outlet at a temperature of about 240° Fahr., without being impregnated with the products of combustion. The china top is removable, and a kettle, saucepan, frying-pan, or other utensil can be employed for cooking purposes.

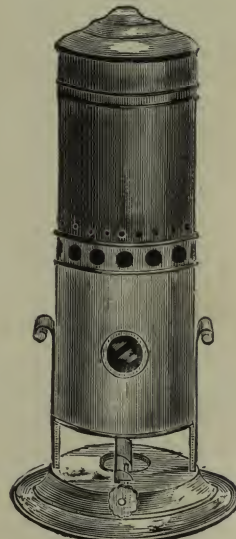

No. 4835/601.—Heating Stove or Apparatus, formed by placing upon the stove a cylinder for conveying the heat into the room. The cylinder can be removed, and a kettle, saucepan, or other utensil substituted. The heating portion can be had separately; it is made in two sizes only.

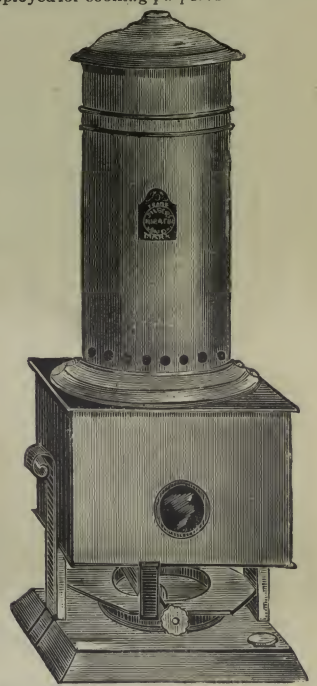

No. 4836/900.—Small Stove, suitable for boiling eggs or sufficient water for two cups of coffee or tea, and is thoroughly suitable for nursery purposes.

No. 4837/903.—Silber's Illuminated Aerotherm, or Heating Stove. This stove is specially constructed for raising the temperature of rooms, halls, and conservatories. The flue is made of china or other ceramic ware, and on both sides there are atmospheric chambers into which the cold air of the apartment is drawn and liberated at the outlet at a temperature of about 240° Fahr., without being impregnated with the products of combustion. The china top is removable, and a kettle, saucepan, frying-pan, or other utensil can be employed for cooking purposes. For cheerfulness we know of no stove at all equal to it in appearance.

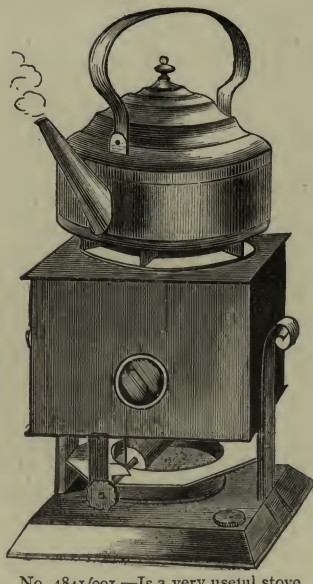

No. 4838/924.—This small Stove is a very useful one, as when not required for heating purposes it can be used with a small kettle for nursery purposes, as shown in engraving No. 4836 (the second in this row).

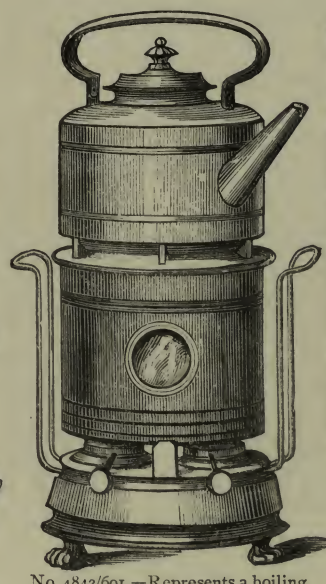

No. 4839/925.—This Heating or Cooking Stove is strongly recommended on account of its twofold capacity for cooking and for heating. It will boil two quarts of water in about twenty-five minutes, and is equally suitable for boiling vegetables or meat, and also for frying purposes. With the heating cylinder (which is of special construction) it makes an excellent heating stove, and is especially suitable for greenhouses and bedroom purposes.

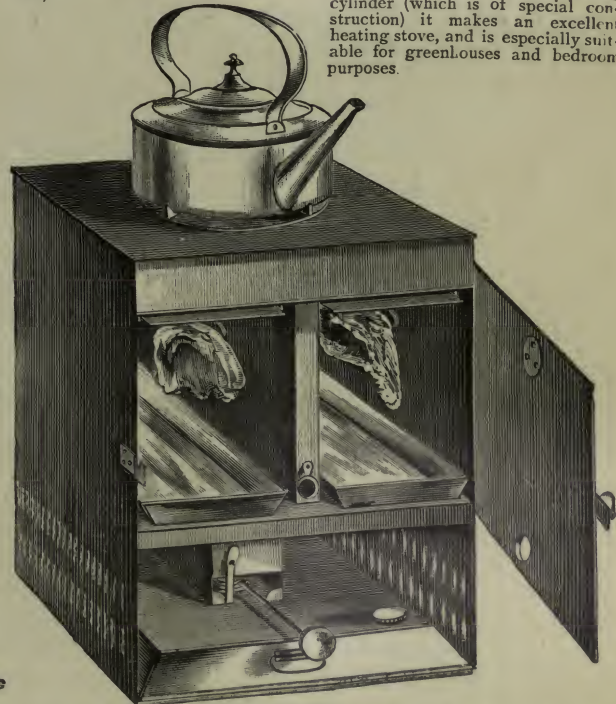

No. 4840/895.—Silber's Patent Miratus Stove, for cooking small joints, chickens, chops, steaks, or pastry, as well as for boiling vegetables or water. Size of oven, 9 1/2 in. x 8 1/2 in. x 6 1/2 in. The cost of the oil consumed in this stove is about one halfpenny per hour.

No. 4841/901.—Is a very useful stove for boiling or frying.

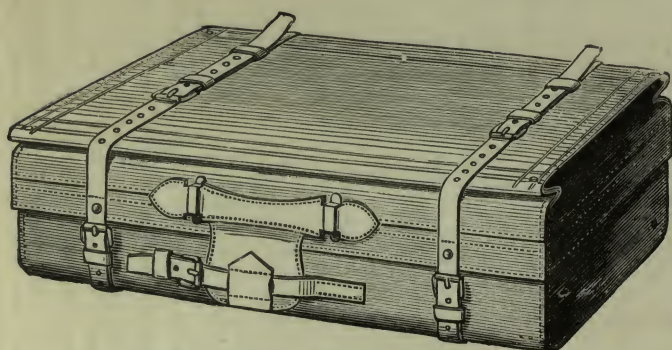

No. 4842/601.—Represents a boiling or frying Stove with kettle; can be had with one or two burners.

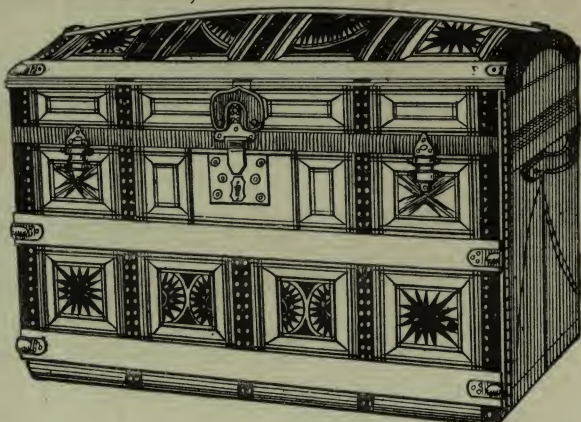

No. 4843/899.—Silber's Breakfast Oven is the handiest article of the kind in the market. It is so arranged that several rashers of bacon and eggs, or three or four chops or steaks, can be cooked in the oven at the same time as the kettle or saucepan is boiling on the top. It is strongly recommended for general use.

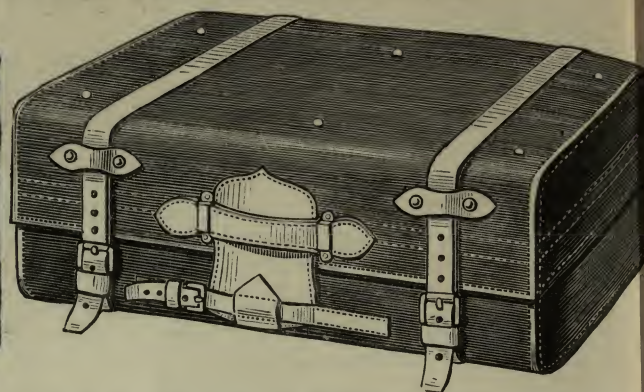

SOLID LEATHER AND BASIL PORTMANTEAUS AND TRUNKS, AMERICAN TRUNKS, LADIES' DRESS BASKETS, HAT AND BONNET BOXES, GLADSTONE AND OTHER TRAVELLING BAGS.

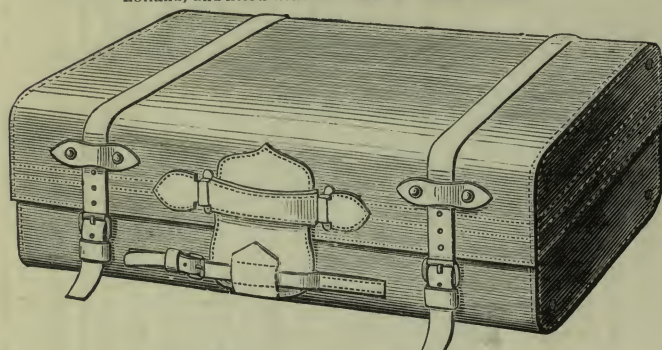

No. 4844.—Coat Case, best Devon basil leather, with expanding top, lined with holland, and fitted with shirt case on inside division.

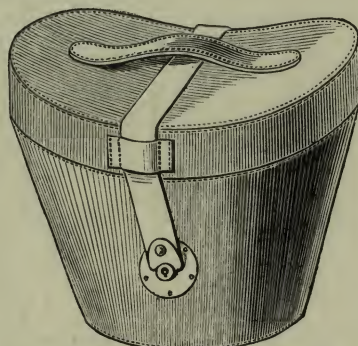

No. 4845.—American Dress Trunk, best quality, covered with split hide, iron bound, sheet-iron bottom, patent bolt fastenings, lined with holland. fitted with tray and compartment for bonnets, hats, jewellery, gloves, umbrellas, boots, &c.

AS FIXED TO TABLE.

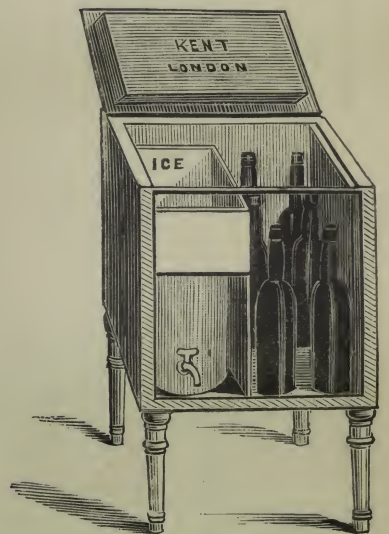

No. 4930.—"Excelsior" Coffee Mill made in four sizes.

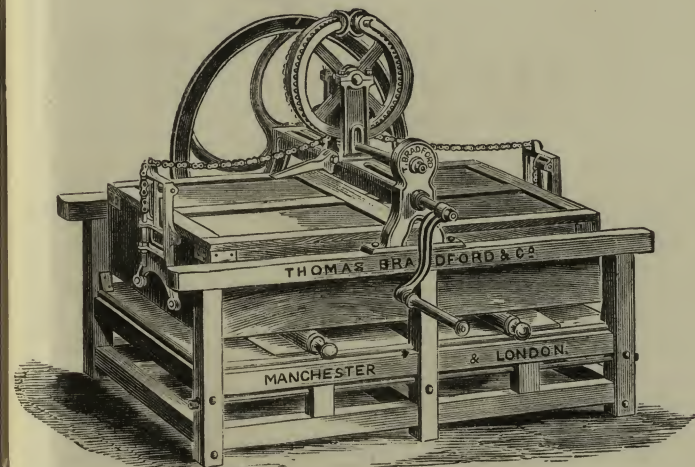

These greatly improved mills are constructed so that they can be quickly screwed to the table or dresser and instantly removed when done with, or they can be permanently fixed to the wall. They are also constructed so that a large amount of grinding surface is brought into operation, and, by means of a regulating lever screw, can be immediately adjusted to grind, either coarse or fine. By a peculiar arrangement, the cutting parts are prevented from injuring each other, thereby securing greater durability. They are provided with a suitable canister for the reception of the coffee or other substance when ground, and which, when not in use, serves as a cover or lid to the hopper. These mills will be found to give the utmost satisfaction, being well made and very effective for grinding coffee, pepper, spice, rice, &c.

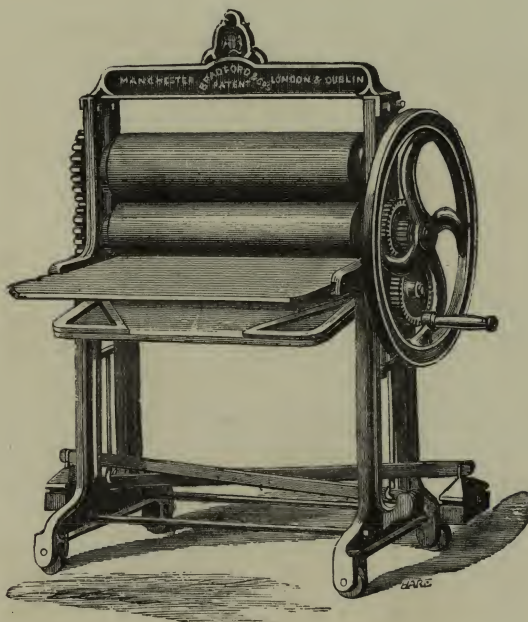

No. 4931.—Wringing Machine, with best vulcanised india-rubber rollers and patent pressure link, which relieves both rollers and linen from undue strain.

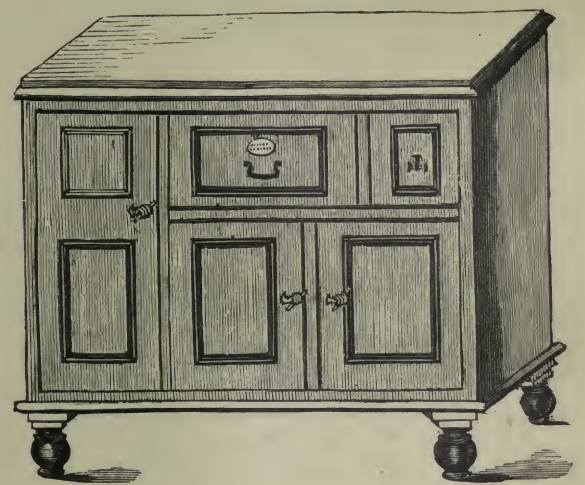

No. 4932.—Ice Box, with separate compartment for ice.

No. 4933.—Improved Premier Box Mangle.

No. 4934.—Improved Wringing and Mangling Machine, with lever and weight pressure.

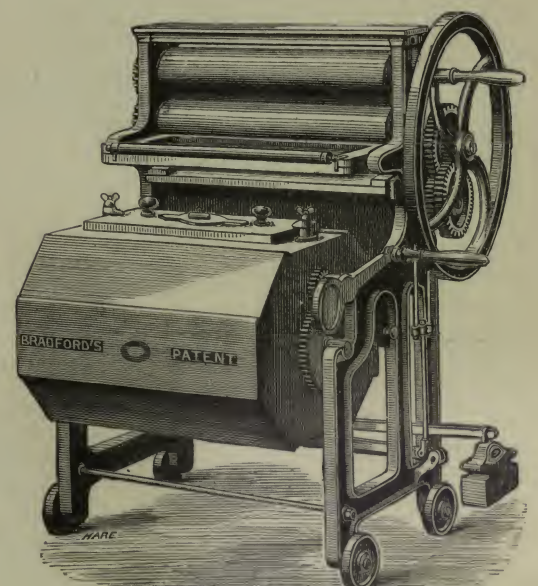

No. 4935.—Ice Safe, suitable for small families. The top may be used as table or sideboard.

No. 4936.—Washing Machine, compact, portable, and a very efficient washer. The above drawing represents the washing machine with Wringing Machine attached.

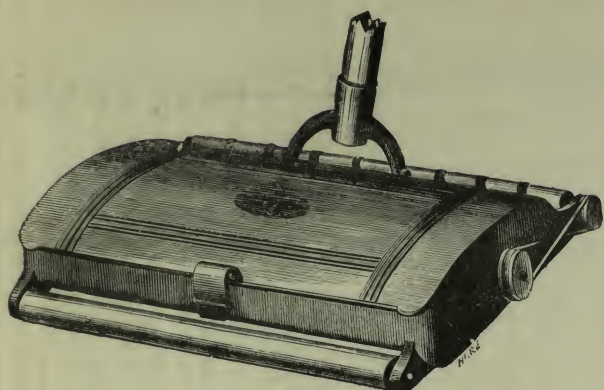

No. 4937.—Rapid Ice-freezing Machine, economical and simple, suitable for family use.

No. 4938.—Washing, Wringing, and Mangling Machine combined. The pressure upon the rollers is obtained by self-adjusting levers that require no care on the part of the user.

JAPANNED TIN WARE, OFFICE REQUISITES, CARPET SWEEPER, TRAYS, TABLE MATS, ETC.

No. 5059.—Round Sugar Box, japanned brown.

No. 5060.—Weighing Machine, with stand and weights.

FILTERS, GLASS AND CHINA WARE.

STONE REFRIGERATIVE FILTERS.

No. 5062.

This Filter is made of porous stone, in the shape of a bottle, and on account of its simplicity in use, will be found invaluable in hot climates, or where it is difficult to obtain pure water.

When filtered water is required, it is only necessary to place the filter empty, even in the most dirty water, ponds, rivers, &c., when the water will filter through the sides into the bottle, from whence it can be used in a purified state.

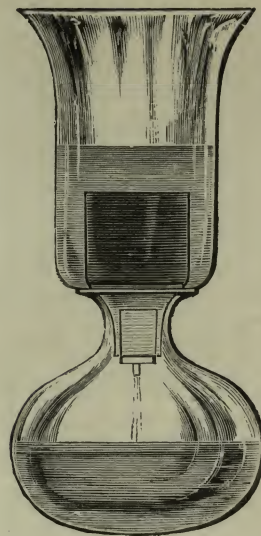

To keep the water in the filter, a cork tightly inserted into the neck will prevent it oozing through, consequently it is especially adapted for travelling purposes.

By slightly raising the cork the water will gently ooze through the sides, and the rapid evaporation from the surface, which always takes place in hot climates, will produce a most refreshing and delightful coolness in the water.

To clean it, it is sufficient to brush the exterior with a hard brush, or to blow into the interior, in order to open the holes in the stone.

When the filter is new or long out of use, the first two or three filterings should be thrown away.

These filters are made in the following sizes:—1 pint, 1 quart, 2 quarts, 3 quarts, 4 quarts, 5 quarts, 6 quarts.

No. 5063.

GLASS FILTERS.

PLAIN, ENGRAVED, OR CUT.

No. 5063.—Glass Filters, fitted with carbon blocks complete, 2 pints, 3 pints, 4 pints.

No. 5063½.—As No. 5063, cut glass, richly engraved, vines and ferns, 2 pints, 3 pints, 4 pints.

These filters are made of stout glass; the filtering medium being securely fitted into the bell funnel, it is not liable to become loose nor to allow the water to pass unfiltered. The filters are suitable for bedroom and table use, affording a ready and simple means of obtaining purified water at any time.

No. 5064.—Earthenware Filter, Admiralty pattern.

These Filters can be taken to pieces, every part of the same can be thoroughly inspected, washed, and kept clean.

No. 5064 is made in six different sizes, to hold either 1, 2, 3, 4, 5, or 6 gallons.

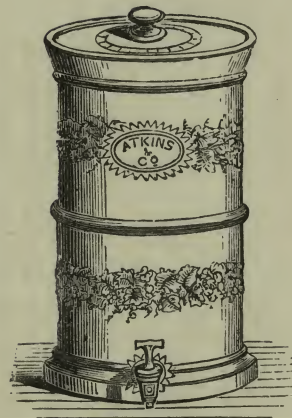

No. 5065 is made in six sizes, to hold either 4, 6, 8, 10, 15, or 20 gallons.

Every other Description of Filters sent to order.

All Filters are carefully packed.

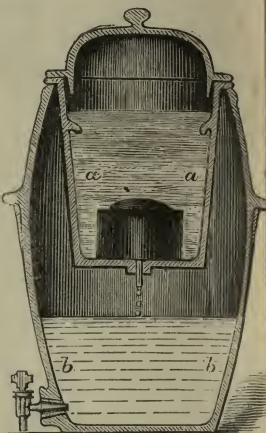

No. 5065.—Barrel-shape earthenware Filter.

No. 5066.—Superior white porcelain.
No. 5067.—Superior white porcelain, and decorated green and gold.

No. 5068 Filter is made in the same shape and outward appearance as No. 5065. Both filter and pan (which is movable) are of the best London made earthenware. The handles of the pan allow the same to be lifted out with great facility, and access is thus obtained to the whole of the interior. The letters (a a) show the movable pan, and b b the space for the filtered water. The charcoal block is the same as those in use in Atkins's "Admiralty Pattern" Filters, which have been in use now throughout the whole of the Royal Navy, Lighthouses, Royal Naval Hospitals, &c., for over fifteen years. The charcoal block is fitted on a thick, strong glass or metal tube, and can be easily taken out and replaced as often as desired. To clean the block it is taken out and scraped with a knife and rinsed in perfectly clean hot water. When worn out a new one may be obtained and fixed in its place. (See "Directions for Use" sent out with each filter.)

No. 5068.—New Patent "Safety" Filter, which takes completely to pieces and allows access to the whole of the interior. Sectional Drawing. For pattern see No. 5065.
